Tools: Git, GitHub, Postman

Other: IOT Device Integration

INTERNSHIP EXPERIENCE

Full Stack Developer Intern

Shambhavi Technovation, Ahmedabad | March 2026 - Present

- Working on full stack web application development using Angular, React, Node.js, and related technologies.
- Developed responsive UI pages, reusable components, and frontend modules.
- Integrated APIs for dynamic data display, form submission, and validation.
- Assisted in backend functionality, database handling, debugging, and testing.

PROJECTS

Bhagyalaxmi Enterprise - Live Dynamic Business Website

Tech Stack: PHP, MySQL, HTML, CSS, JavaScript, Bootstrap | Live: bhagyalaxmiplywood.com

- Developed a live business website with admin panel functionality.
- Added modules for products, categories, gallery, news/updates, reviews, contact details, and SEO content.
- Built admin-side CRUD features for managing website content dynamically.

CarePlus Hospital Management System - MCA Advanced Version

Tech Stack: .NET / ASP.NET, SQL Server / MySQL, HTML, CSS, JavaScript, Bootstrap

- Developed an advanced hospital management system with patient, doctor, appointment, and record modules.
- Implemented admin-side management, form validation, database CRUD operations, and improved application flow.

CarePlus Hospital Management System - BCA Basic Version

Tech Stack: Liferay Framework, MySQL, HTML, CSS, JavaScript

- Built the basic version with hospital search, appointment booking, and doctor-side approval/rejection features.
- Later enhanced and rebuilt this project with advanced functionality during MCA.
